

HEART AND STROKE PROVIDER TOOLKITS

TAKE ACTION!

PREVENT, CONTROL AND MANAGE PATIENT CARE

Your patients rely on you for medically accurate, up-to-date preventive health information. The Heart and Stroke Toolkits were developed specifically for health care providers and include recommendations and resources to care for patients who are at-risk or who have hypertension, heart disease and/or suffered a stroke.

PREVENTION

WHAT IS THE PURPOSE OF THE TOOLKIT?

Heart disease is the leading cause of death in Nevada. The Nevada Heart Disease and Stroke Taskforce developed comprehensive high blood pressure and stroke resource toolkits to help providers and clinicians supply quality reference materials to patients for disease prevention and management.

Provider resource toolkits include:

- Clinical guidelines and recommendations to develop comprehensive treatment plans for hypertension patients.
- Tip sheets to help empower patients to monitor blood pressure.
- Educational fact sheets to share with patients.
- NIH acute stroke assessment, treatment resources and information sheets to complement conversations with patients and families.

TAKE ACTION!

- Take action to empower patients to adopt a heart-healthy lifestyle.
- Use the toolkit resources to help patients manage and/or control blood pressure.
- Make hypertension control a priority.
