Fresh Fruit & Vegetable Program

Broccoli Worksheets
Introduction

The Fresh Fruit and Vegetable Program (FFVP) is a federally assisted program that your school is participating in this year. The goal of the FFVP is to improve children’s overall diet and create healthier eating habits to impact their present and future health. The Southern Nevada Health District has adapted materials from California’s Harvest of the Month program, to provide schools with easy to use teaching points and worksheets to help them meet the nutrition education requirements of the FFVP.

Taste Test Teaching Points
Broccoli

Grades: Kindergarten to 2nd Grade

Title of Lesson: Broccoli

Materials: POM Broccoli Student Worksheet
POM Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review POM FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Broccoli is in the green color group. Green fruit and vegetables help keep your eyes, bones and teeth strong and healthy.

Broccoli is known as the “Crown Jewel of Nutrition”. Why do you think it is called that? It is very rich in vitamins and minerals – 130% of the Daily Value for vitamin C, good source of vitamin A, ounce for ounce as much calcium as milk, beta carotene, potassium, folate, iron and soluble fiber.

Broccoli is a plant of the cabbage family. Have you ever seen or tasted a cabbage? Have you ever seen or tasted broccoli?

Broccoli has been around for a very long time, about 2000 years.

Broccoli was first grown in Italy. It got the name brocco, an Italian word meaning branch or arm. Broccoli is plural and refers to the numerous flower-like shoots that form the head of the plant.

We have had broccoli in the United States for more than 200 years.

California grows more broccoli than any other state, 90% of the nation’s crop.

Broccoli can be eaten raw or cooked. What is your favorite way to eat broccoli?

People today eat much more broccoli than 25 years ago. 940% more! People in the United States eat 4.5 pounds of broccoli each year.

Broccoli is one of the easiest garden vegetables to grow. Broccoli is grown from seed. It takes 100-120 days for the broccoli to be ready to pick.

Broccoli is available all year long for us to enjoy.

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing

Broccoli is known as the “Crown Jewel of Nutrition”. Why do you think it is called that? It is very rich in vitamins and minerals – 130% of the Daily Value for vitamin C, good source of vitamin A, ounce for ounce as much calcium as milk, beta carotene, potassium, folate, iron and soluble fiber.

Broccoli is a plant of the cabbage family.

Broccoli can be eaten raw or cooked. What is your favorite way to eat broccoli?

Broccoli has been around for a very long time, about 2000 years.

A son of a Roman Emperor loved broccoli so much, he refused to eat any other foods except “broccoli a la apicius” (a mixture of cumin, coriander seeds, chopped onion, oil and sun-made wine) for a month.

It was first grown in an Italian province of Calabria and was given the name Calabrese. Eventually, the vegetable got the nickname brocco, meaning branch or arm. Do you think broccoli looks like an arm or a branch? Broccoli is the plural form and means flower like shoots that form the head of the plant. In agricultural terms, it is often referred to as a cole crop, meaning that it is grown for the head it produces.

We have had broccoli in the United States for more than 200 years.

California grows more broccoli than any other state, 90% of the nation’s crop.

People today eat much more broccoli than 25 years ago. 940% more! People in the United States eat 4.5 pounds of broccoli each year.

Despite its popularity through the years, few people knew about broccoli in the United States until the 1920s.

Broccoli is one of the easiest garden vegetables to grow. Broccoli is grown from seed. It takes 100-120 days for the broccoli to be ready to pick.

Broccoli is available all year long for us to enjoy.

Broccoli Poetry

Directions: Create a poem about broccoli to share with your class using descriptive words.

Example: **Corn**

Corn is yellow, crisp and sweet
So delicious to eat
It is firm, solid and bright
Just an absolute delight!

Brainstorm
List some descriptive words that can be used in your poem.

- Nutritious
- __________
- __________
- __________

Fill in the blanks to create your poem.

_____________

_______ is _______ _______ and _______

So _________ to _________

It is _________ _______ and _______

Just an _________ _______
Use MyPyramid to make HEALTHY food choices!

**Directions:** Color in each section of the MyPyramid and then list foods that belong in each group.

**Hint:**
- Grains: Orange
- Vegetable: Green
- Fruit: Red
- Milk: Blue
- Fats & Oils: Yellow
- Meats & Beans: Purple

Eat a Rainbow!

Have you ever heard your teacher tell you that it is important to eat a rainbow? That’s because fruits and vegetables come in a rainbow of colors. Each color keeps your body strong in a different way. Make sure you eat a rainbow of colorful fruits and vegetables every day—red, yellow/orange, white, green, and blue/purple!

<table>
<thead>
<tr>
<th>Color</th>

Glossary of Nutrients

**CALCIUM**  This mineral helps build strong bones and healthy teeth.

**CARBOHYDRATE**  Carbohydrates are a main nutrient found in food. Carbohydrates are the body's major source of energy.

**FAT**  Fat helps a child’s body grow and develop like it should. Fat gives the body energy and helps absorb some vitamins. There are different types of fat. Unsaturated fats may be good for your heart while eating trans fat or too much saturated fat may be unhealthy for your heart.

**FIBER**  Fiber promotes good digestion and helps maintain a healthy heart. It also helps you feel full after a meal or snack.

**IRON**  This mineral helps red blood cells carry oxygen to all the parts of your body.

**PHYTOCHEMICALS**  Phytochemicals are naturally found in plants and may help prevent disease and promote good health. Different kinds of phytochemicals give fruits and vegetables their bright colors. Eat red, orange, green, white, and purple fruits and vegetables for better health.

**PROTEIN**  Protein is found in many different types of food. Protein builds up, maintains, and replaces the tissues in the body. Muscles, organs, and the immune system are made up mostly of protein.

**VITAMIN A**  This vitamin helps your body maintain healthy eyes and skin.

**VITAMIN C**  This vitamin helps the body heal cuts and wounds and maintain healthy gums.

**VITAMIN E**  This vitamin helps maintain healthy cells throughout your body.

**WATER**  Water makes up more than half of your body weight. Your body cannot survive for more than a few days without it. It helps your body work right.

Taste Test Teaching Points
Carrots

Grades: Kindergarten to 2nd Grade
Title of Lesson: Carrots
Materials: FFVP Carrots Student Worksheet
          FFVP Taste Test Teaching Points Lesson Plan
          Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Carrots or “skirrets” grow under the ground. They are a root vegetable. The part you eat is called a “taproot.” Do you know the name of another root vegetable?

Carrots are in the yellow/orange color group. Fruits and vegetables in this color group help maintain a healthy heart, healthy eyes and a healthy immune system (your immune system is found inside your body and fights off germs that can make you sick). They also can lower your chance of getting some cancers.

Carrots are rich in beta-carotene. Beta-carotene is found only in plants. This plant pigment/color was first identified in carrots; therefore, the word carotene comes from the word carrot.

Carrots are a good source of fiber. Fiber helps move food through your body.

There is a wild carrot known as “Queen Anne’s Lace.” It has a beautiful white flower and grows a root you can eat if you dig it up when young. Today Queen Anne’s Lace is considered a weed.

The great grandfather of the carrot we eat today was not orange but white, black, purple or yellow.

In the middle ages, carrot juice was used to make butter a more appealing color. Women used the leaves of carrots as a decoration in their hair and hats.

In the 1600’s, Dutch farmers developed the orange carrot in honor of royal family “The House of Orange.” This is the sweet carrot we eat today.

The early American colonists grew carrots between rows of tobacco to repel beetles.

Thomas Jefferson, our 3rd President, grew many colors of carrots in his garden at Monticello.

Have you ever heard the expression “dangling a carrot?” It originated in the 1890’s when carrots were dangled in front of donkeys to get them to move. Donkeys love to eat carrots. They have the second highest natural sugar content of any vegetable. (Beets have the highest sugar content of vegetables.)

During WWII, the British developed a special variety of carrot with a high beta-carotene level. They thought these special carrots might help the pilots see better at night. Why do you think they thought that?

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing

Carrots

Grades: 3rd to 5th Grade
Title of Lesson: Carrots
Materials:
- FFVP Carrots Student Worksheet
- FFVP Taste Test Teaching Points Lesson Plan
- Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Carrots grow under the ground. They are a root vegetable. The part you eat is called a “taproot.” Do you know the name of another root vegetable?

Have you ever eaten baby carrots? Baby carrots are not necessarily small carrots, but are made from full-grown, small diameter carrots by peeling and cutting them to the desired length. Farmers plant carrots intended for the baby-cut market closer together so the roots stay slim and there is less waste when the carrots are cut to size. True baby carrots are removed from the ground early and actually look like miniature carrots.

Carrots are in the yellow/orange color group. Fruits and vegetables in this color group help maintain a healthy heart, healthy eyes and a healthy immune system (your immune system is found inside your body and fights off germs that can make you sick). They also can lower your chance of getting some cancers.

Carrots contain plant pigments called carotenoids. There are 600 different carotenoids. Beta-carotene, also present in carrots, is a member of this group. Carotenoids were first identified in carrots, therefore; the origin of the name came from the word carrot.

When you eat foods rich in beta-carotene, your body turns the beta-carotene into vitamin A. The carrot we eat today was cultivated from the wild carrot. The wild carrot was actually a wild flower known as “Queen Anne’s Lace.”

The great grandfather of the carrot we eat today was not orange but white, black, purple or yellow and somewhat bitter tasting.

In the middle ages, carrot juice was used to make butter a more appealing color. Women used the leaves of carrots as a decoration in their hair and hats.

In the 1600’s, Dutch farmers developed the orange carrot in honor of royal family “The House of Orange.” This is the sweet carrot we eat today.

The early American colonists grew carrots between rows of tobacco to repel beetles.

Thomas Jefferson, our 3rd President, grew carrots in his garden at Monticello.

My fiber helps food move through your intestines!

My lovely orange color helps your body make vitamin A. Vitamin A helps maintain healthy eyesight!
Directions: Write a paragraph about the nutritious value of carrots.

- I am crunchy and nutritious!
- I have vitamins that help you grow!
- My fiber helps food move through your intestines!
- My lovely orange color helps your body make vitamin A. Vitamin A helps maintain healthy eyesight!

Draw a picture of a carrot
Choose Natural

**Processed Foods** are less nutritious because they generally have more sugar and fat.

**Natural and Whole Foods** are more nutritious because they are naturally full of vitamins, minerals and fiber.

**Directions:** Color in the appropriate colors of the Food Pyramid.

The top of the MyPyramid is more narrow than the bottom. This helps determine which foods are HEALTHIER for you. **Whole and natural foods** belong at the bottom of the pyramid. **Processed foods**, as well as other foods high in refined sugars and fats, belong at the top! For example, low-fat milk would be placed at the bottom of the MILK group and ice cream would be placed at the top.

**Directions:** Practice determining which foods are whole and natural and which foods are processed by checking off the correct box below.

I can’t see well at night and my eyes are dry! I need more ________________.

Sometimes my food just sits in my intestines! I need to get more _______________ in my diet!

To maintain heart health, I need more antioxidants such as _______________ and _______________. I can get them eating more yellow and orange fruits and vegetables.

To avoid muscle cramps, I can eat more _______________ because it will help maintain the right acid balance in body fluids.

My cuts heal slowly! I need more _______________.

To keep my energy level high and to avoid a red and sore tongue I need more _______________ in my diet!

___________ helps with muscle contractions and maintaining strong bones. I can get more of this nutrient from dairy products and green leafy products.
Glossary of Nutrients

**CALCIUM** This mineral helps build strong bones and healthy teeth.

**CARBOHYDRATE** Carbohydrates are a main nutrient found in food. Carbohydrates are the body’s major source of energy.

**FAT** Fat helps a child’s body grow and develop like it should. Fat gives the body energy and helps absorb some vitamins. There are different types of fat. Unsaturated fats may be good for your heart while eating trans fat or too much saturated fat may be unhealthy for your heart.

**FIBER** Fiber promotes good digestion and helps maintain a healthy heart. It also helps you feel full after a meal or snack.

**IRON** This mineral helps red blood cells carry oxygen to all the parts of your body.

**PHYTOCHEMICALS** Phytochemicals are naturally found in plants and may help prevent disease and promote good health. Different kinds of phytochemicals give fruits and vegetables their bright colors. Eat red, orange, green, white, and purple fruits and vegetables for better health.

**PROTEIN** Protein is found in many different types of food. Protein builds up, maintains, and replaces the tissues in the body. Muscles, organs, and the immune system are made up mostly of protein.

**VITAMIN A** This vitamin helps your body maintain healthy eyes and skin.

**VITAMIN C** This vitamin helps the body heal cuts and wounds and maintain healthy gums.

**VITAMIN E** This vitamin helps maintain healthy cells throughout your body.

**WATER** Water makes up more than half of your body weight. Your body cannot survive for more than a few days without it. It helps your body work right.

Fresh Fruit & Vegetable Program

Salad Greens Worksheets
Introduction

The Fresh Fruit and Vegetable Program (FFVP) is a federally assisted program that your school is participating in this year. The goal of the FFVP is to improve children’s overall diet and create healthier eating habits to impact their present and future health. The Southern Nevada Health District has adapted materials from California’s Harvest of the Month program, to provide schools with easy to use teaching points and worksheets to help them meet the nutrition education requirements of the FFVP.

Taste Test Teaching Points
Salad Greens

Grades: Kindergarten to 2nd Grade
Title of Lesson: Salad Greens
Materials: FFVP Salad Greens Student Worksheet
FFVP Taste Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes
1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Salad greens originated from the Mediterranean basin around 79 A.D., when they found them on paintings of ancient Egyptian tombs. Lettuce was one of the first vegetables brought to the new world by Columbus, probably on his second voyage.

Salad greens are a vegetable and they grow in the ground.

Salad greens come in a variety of colors like light green, dark green, and even red!

There are hundreds of varieties of lettuce, which belong to the sunflower family. Romaine, red and green leaf, butterhead, spinach, mustard, arugula, bib, and iceberg lettuce are all different types of salad greens.

Most lettuce greens are very nutritious. Two handfuls of green leaf lettuce contain a high source of Vitamins A, C, and K.

Vitamin K helps our blood clot, which is very important for our health. When we accidentally get cut, our blood clots to stop the bleeding.

Vitamin A helps us see better and keeps our skin healthy.

Americans eat about 30 pounds of lettuce each year.

California is the number one producer of leaf lettuce in the country.

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing

Salad Greens

The darker in color, the more nutritious I am for you!

Directions: What kind of vegetables can you add to a salad to boost the nutrition content?
Part 1
You can find lots of colorful fruits and vegetables in your supermarket. Some of them are hiding in this fruit and vegetable word-find puzzle. Find the ones listed in the puzzle and circle them. Then color the letters to show which color group each fruit and vegetable belongs in.

Fruits and Vegetables To Find:
APPLES
APRICOTS
BANANA
CARROT
PEAS
SPINACH
POTATOES
RAISINS
CORN

Part 2
You can buy many fruits and vegetables in different forms. They come fresh, frozen, as juices, canned and even dried. They can be found in different places in the supermarket. In the chart, check (✓) the different forms in which you might find the fruits and vegetables listed.

SNHD
Champions for Change

This material was adapted from the California Harvest of the Month program materials. This material was funded by the USDA's Supplemental Nutrition Assistance Program (SNAP), an equal opportunity provider and employer. The SNAP program provides nutrition assistance to people with low income. It can help you buy nutritious food for a better diet. For information on the SNAP program, call 1-888-328-3663.
Setting Healthy Goals

When we want to make a positive change in our lives, it helps to set goals. You can set goals to be more physically active or eat better (by eating more fruits and vegetables, drinking more non-fat milk, and choosing more whole grains).

Steps to Setting a Goal:

1. Define your goal.
2. Write down the small steps you will need to take to achieve this goal.
3. Set a deadline.

1. My healthy goal is to _____________________________________________.

2. To achieve this goal, I need to take the following steps:
   A. _____________________________________________.
   B. _____________________________________________.
   C. _____________________________________________.

3. The deadline for me to achieve my goal is _____________.

Taste Test Teaching Points
Spinach

Grades: Kindergarten to 2nd Grade

Title of Lesson: Spinach

Materials: FFVP Spinach Student Worksheet
FFVP Taste Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

Many plants are grown for their leaves. Leafy plants are referred to as greens. They include spinach, kale, collards and mustard. Spinach is a small leafy green vegetable. It is soft with leaves that are oval to arrow-shaped. You can eat both the leaves and stems.

Spinach originally came from Persia (now Iran). Our name for spinach came from the Persian word “ispanai” which means “green hand” which later became “spanachia” (Latin) and today, spinach. People long ago named it ‘the prince of vegetables’. The green leafy vegetable made its way to China as a gift from the King of Nepal.

When spinach was introduced in Italy, it became the favorite vegetable of a famous Italian family. When the daughter, whose name was Catherine de Medici, left her home in Florence Italy to marry King Henry II of France, she brought along her own cooks who could prepare spinach in the many different ways that she liked. Since this time, dishes prepared on a bed of spinach are referred to as “à la Florentine”.

European settlers brought spinach as they settled in the New World.

The cartoon character Popeye was introduced in 1929. Popeye was very strong. He was strong because he ate spinach every day. For many years, spinach was the third most popular children’s food after turkey and ice cream. What is your favorite food?

Today, California is the leading producer of fresh and processed spinach in the United States. Processed spinach means the spinach is canned, frozen or puréed for baby food. Look for fresh, leafy, spinach in the produce section of the grocery store.

The number of people eating fresh spinach has increased. This is mostly due to the pre-cut, bagged spinach that is available today.

Spinach is in the green color food group. Eating 2 cups of raw spinach in a salad, will give you all of the vitamin A you will need for the day. It also gives you more than 4 times the Vitamin K you need for the day.

Spinach is the richest plant source of folate. Folate plays an important role in making new body cells. Other foods you can eat that contain folate are avocados, milk, oranges and peanuts.

Would you like to taste spinach now?

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing

Adding Fruits and Vegetables

Directions: Fill in each box with one of your favorite kind of fruit or vegetable and solve the math problem.

\[
\begin{align*}
\text{apples} & + \text{apples} = ____ \\
\text{broccoli} & + \text{broccoli} = ____
\end{align*}
\]

Are there more apples or broccoli? _________

Directions: Fill in each box with one of your favorite kind of fruit or vegetable and solve the math problem.
Spinach

Write 6 adjectives that describe spinach. Remember to use your five senses (sight, smell, taste, touch, & sound). Then, using your list of adjectives write at least 3 sentences about spinach.

1. ________________________
2. __________________________
3. ___________________________
4. ________________________
5. ___________________________

Eat a Rainbow!

Have you ever heard your teacher tell you that it is important to eat a rainbow? That’s because fruits and vegetables come in a rainbow of colors. Each color keeps your body strong in a different way. Make sure you eat a rainbow of colorful fruits and vegetables every day—red, yellow/orange, white, green, and blue/purple!

Red: Help you have a strong heart and a good memory.

Yellow/Orange: Help you have good vision, a strong heart, and keep you from getting sick.

Green: Help you have strong bones and teeth and good vision.

Today’s fresh fruit/vegetable is: ________________________________________________________________.

The color of this fruit/vegetable is: ________________________________________________________________.

Eating this color can help my body by: ________________________________________________________________.

Other fruits and vegetables that are the same color are: ________________________________________________________________.

I plan to eat ____________________ cups of fruits and vegetables every day.
Eating spinach is a great way to give your body the vitamins, minerals, and nutrients it needs to stay strong and healthy!

Draw a picture of spinach above

**Directions:** Write a descriptive paragraph about spinach. Remember to use descriptive words and adjectives.

Eat a variety of colored Fruits & Vegetables!
Different colors help the body in different ways!

Directions: First, read the names of fruits and vegetables in the boxes below. Next, think of what color that produce is, and then color the box with that color. Finally, list the produce according to their color.

HINT: Use a dictionary to find a fruit or vegetable that you do not recognize.

Glossary of Nutrients

**CALCIUM** This mineral helps build strong bones and healthy teeth.

**CARBOHYDRATE** Carbohydrates are a main nutrient found in food. Carbohydrates are the body’s major source of energy.

**FAT** Fat helps a child’s body grow and develop like it should. Fat gives the body energy and helps absorb some vitamins. There are different types of fat. Unsaturated fats may be good for your heart while eating trans fat or too much saturated fat may be unhealthy for your heart.

**FIBER** Fiber promotes good digestion and helps maintain a healthy heart. It also helps you feel full after a meal or snack.

**IRON** This mineral helps red blood cells carry oxygen to all the parts of your body.

**PHYTOCHEMICALS** Phytochemicals are naturally found in plants and may help prevent disease and promote good health. Different kinds of phytochemicals give fruits and vegetables their bright colors. Eat red, orange, green, white, and purple fruits and vegetables for better health.

**PROTEIN** Protein is found in many different types of food. Protein builds up, maintains, and replaces the tissues in the body. Muscles, organs, and the immune system are made up mostly of protein.

**VITAMIN A** This vitamin helps your body maintain healthy eyes and skin.

**VITAMIN C** This vitamin helps the body heal cuts and wounds and maintain healthy gums.

**VITAMIN E** This vitamin helps maintain healthy cells throughout your body.

**WATER** Water makes up more than half of your body weight. Your body cannot survive for more than a few days without it. It helps your body work right.

Fresh Fruit & Vegetable Program

Tomato Worksheets
# Introduction

The Fresh Fruit and Vegetable Program (FFVP) is a federally assisted program that your school is participating in this year. The goal of the FFVP is to improve children’s overall diet and create healthier eating habits to impact their present and future health. The Southern Nevada Health District has adapted materials from California’s *Harvest of the Month* program, to provide schools with easy to use teaching points and worksheets to help them meet the nutrition education requirements of the FFVP.

Taste Test Teaching Points
Tomato

Grades: Kindergarten to 2nd Grade

Title of Lesson: Tomatoes

Materials: FFVP Tomato Student Worksheet
FFVP Taste Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

The word “tomato” is derived from the Nahuati (Aztec language) word, tomatl, meaning “something round and plump.”

Tomatoes can be red, yellow/orange or green. The yellow/orange tomato is sweeter than the red or green tomato. Have you ever tasted a yellow/orange tomato?

Those fruits and vegetables in the red color group help keep your heart healthy and help you remember things (memory). Can you name some examples of red fruits or vegetables? Red tomatoes, red apples, pink grapefruit, beets, red peppers, red onions and radishes.

Many varieties of tomatoes exist and are commonly divided into categories based on shape, use and size (small to large):

- **Cherry**: sweet tomatoes, usually eaten whole in salads
- **Plum**: pear-shaped, more meaty, ideal for tomato products, also called Italian or Roma
- **Slicing**: round or globe-shaped, used mainly for commerce and processed products
- **Beefsteak**: round, juicy, used mainly for sandwiches

Botanically, the tomato is a fruit. If it has seeds, it is a fruit. However, in 1893, the U.S. Supreme Court declared it as a vegetable.

Tomatoes are grown in every state in the United States except Alaska. The tomato is a warm weather perennial plant, sensitive to frost at any stage of growth.

California grows 95 percent of the nation’s tomatoes for processing. Processed tomato products include: ketchup, canned tomatoes, salsa, tomato sauce, tomato soup and tomato paste.

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing
Taste Test Teaching Points
Tomato

Grades: 3rd to 5th Grade

Title of Lesson: Tomatoes

Materials: FFVP Tomato Student Worksheet
FFVP Taste Test Teaching Points Lesson Plan
Produce samples prepared by school food service staff

Procedure: 10-15 minutes

1. Review FFVP worksheet (interactive, 5-7 minutes)

Examples/suggested teaching points (as time permits)

The word “tomato” is derived from the Nahuati (Aztec language) word, tomatl, meaning “something round and plump.”

There are more than 4,000 varieties of tomatoes and are commonly divided into these categories, based on shape, use and size (small to large):
- Cherry: sweet tomatoes, usually eaten whole in salads
- Plum: pear-shaped, more meaty, ideal for tomato products, also called Italian or Roma
- Slicing: round or globe-shaped, used mainly for commerce and processed products
- Beefsteak: round, juicy, used mainly for sandwiches

Tomatoes can be red, yellow/orange or green. Those fruits and vegetables in the red color group help maintain heart health, memory function, and urinary tract health. Can you name some examples of red fruits or vegetables? Red tomatoes, red apples, pink grapefruit, beets, red peppers, red onions and radishes. There is also a yellow/orange tomato. It is sweeter than the red or green tomato and contains more vitamin C and potassium, but no lycopene. Lycopene is found in red tomatoes and many other red fruits and vegetables.

Botanically, the tomato is a fruit. If it has seeds, it is a fruit. However, in 1893, the U.S. Supreme Court declared it as a vegetable.

The tomato is a warm weather perennial plant, sensitive to frost at any stage of growth. Tomatoes are grown in every state in the United States except Alaska. Tomatoes grown for the fresh market are hand harvested at mature green fruit stage.

California grows 95 percent of the nation’s tomatoes for processing. Processed tomato products include: ketchup, canned tomatoes, salsa, tomato sauce, tomato soup and tomato paste.

The first tomatoes can be traced back to the Andes in Peru, where they grew wild as cherry-sized berries. In the mid 1500’s, Spanish conquistadors carried tomato seeds back to Europe where they were embraced in Italy, Spain and Portugal. In 17th and 18th century England, tomatoes were believed to be poisonous. Thomas Jefferson was one of the first Americans to grow tomatoes at his Virginia home as early as 1781. What was Thomas Jefferson’s home called? (Monticello) Thomas Jefferson was our 3rd president.

2. Taste produce (3-6 minutes). Serve produce prepared by school food service staff. Engage senses: taste, touch, smell, see, hear.

3. Concluding Activity (2 minutes) If time permits, questions/sharing

Juicy tomatoes grow on a vine. Can you count how many tomatoes are on this vine?
Tomatoes grow on a vine.
One cup of tomatoes is an excellent source of vitamin A and vitamin C.
California is the nation's tomato capital.

Juicy tomatoes grow on vines. Tomatoes start off green in color and then turn red. How many tomatoes are on this vine?

________

Color the 5 smaller tomatoes green and the 2 larger tomatoes red.

Write the equation to figure out how many more small green tomatoes there are than the large red tomatoes.

= 
Write some adjectives that describe the tomato that you drew in the box.

1. smooth
2. ____________
3. ____________

Draw a picture of a tomato below

Directions: Write a complete sentences about tomatoes. Use one or more of the describing adjectives.

Example: The smooth tomato is good for me.
Did you know?

- One cup of tomatoes is an excellent source of vitamins A and C.
- Tomatoes contain antioxidants that may decrease the risk of certain cancers and heart disease.

Take A Survey

Ask the students in your class whether or not they like tomatoes. Record a tally mark for each answer in the yes or no column.

<table>
<thead>
<tr>
<th>Yes, I like tomatoes.</th>
<th>No, I don’t like tomatoes.</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>

Make a plan for how you will include fruits and vegetables in every meal.

For breakfast, I will eat______________________________________________

For lunch, I will choose______________________________________________

For dinner, I will eat______________________________________________

I am currently eating ____ cups of fruit and ____ cups of vegetables. I will need to eat ____ cups of fruit and ____ cups of vegetables to reach my goal.

My Goals!
Tomatoes

- Tomatoes are a high source of vitamins A and C.
- Tomatoes, along with all fruits and vegetables contain antioxidants. Antioxidants help keep our body healthy.
- When a produce item has seeds, most of the time it is called a fruit. In 1893, the U.S. Supreme Court declared the tomato a vegetable, along with cucumbers, squashes, beans, and peas. This came about as a result of tariff laws in 1887, which imposed a tax on vegetables but not fruits.

Summarize the above information:

This material was adapted from the California Harvest of the Month program materials. This material was funded by the USDA’s Supplemental Nutrition Assistance Program (SNAP), an equal opportunity provider and employer. The SNAP program provides nutrition assistance to people with low income. It can help you buy nutritious food for a better diet. For information on the SNAP program, call 1-888-328-3463.
Making a Plan

Using the chart below, find out how many cups of fruits and vegetables you should eat every day.

<table>
<thead>
<tr>
<th>Boys</th>
<th>Age 10</th>
<th>Age 11</th>
<th>Age 12</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Fruits</strong></td>
<td>1.5 cups</td>
<td>2 cups</td>
<td>2 cups</td>
</tr>
<tr>
<td><strong>Vegetables</strong></td>
<td>2.5 cups</td>
<td>2.5 cups</td>
<td>3 cups</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Girls</th>
<th>Age 10</th>
<th>Age 11</th>
<th>Age 12</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Fruits</strong></td>
<td>1.5 cups</td>
<td>1.5 cups</td>
<td>2 cups</td>
</tr>
<tr>
<td><strong>Vegetables</strong></td>
<td>2.5 cups</td>
<td>2.5 cups</td>
<td>2.5 cups</td>
</tr>
</tbody>
</table>

Please note: The recommended cups of fruits and vegetables listed on this chart are based on moderately active individuals (30-60 minutes of physical activity per day) from www.fruitsandveggiesmorematters.gov

Make a plan for how you will include fruits and vegetables in every meal.

For breakfast, I will eat_____________________________________________
_______________________________________________________________

For lunch, I will choose_____________________________________________
_______________________________________________________________

For dinner, I will eat_______________________________________________
_______________________________________________________________

I am currently eating ____ cups of fruit and ____ cups of vegetables. I will need to eat ____ cups of fruit and ____ cups of vegetables to reach my goal.

My Goals!
You do not need to carry measuring cups with you to eat your recommended amount of fruits and vegetables. The key to a healthy life is in your hands!

1/2 cup of fruit

1 cup of raw leafy greens

1/2 cup of vegetables

1 cup of fruit

1/2 cup of vegetables

1/4 cup of dried fruit

1/2 cup of vegetables

Acknowledgements

This worksheets were adapted from the Harvest of the Month workbook which was created in collaboration with Downey Unified School District’s Network for a Healthy California who developed Kindergarten through 2nd grade workbooks and ABC Unified School District’s Network for a Healthy California who developed 3rd through 6th grade workbooks. We would also like to thank Hawthorne and Montebello Unified School District’s Network for a Healthy California staff for sharing their lessons, creativity, and passion for nutrition education.
