

CANNABIS

Approximately 3 in 10 people who use cannabis will develop **MARIJUANA USE DISORDER (CANNABIS ADDICTION)**, and the risk increases for youth users.

Cannabis use directly affects areas of the brain responsible for coordination, emotions, decision-making, and reaction time.

Cannabis can **damage the lungs, increase the risk of stroke and heart disease,** and is linked to social anxiety, depression, suicide, and schizophrenia.

Current Nevada data shows:

15.6% of high school students used marijuana during the past 30 days.

35% of high school students who used in the last 30 days reported **using cannabis 20 or more times** during the past 30 days.

49.2% of high school students who usually use cannabis reported **smoking as method use.**

18.9% of high school students who usually use cannabis reported **vaping as method use.**

Cannabis is not legal federally, and people under 21 are prohibited from **buying, possessing, selling, using, or receiving any recreational cannabis product** in Nevada.

Only state-licensed retail stores, dispensaries, or consumption lounges are legally authorized to sell cannabis. **Purchasing from any other source is illegal.**

It is illegal for drivers and passengers to use cannabis products in any moving vehicle, including rideshares, taxis, RVs, ATVs, and limousines.
